Subject: Finalization of SPV Module Make and Model – 25 MW Solar with 50 MWh BESS Project, Leh

Sir,

This has reference to our letter dated 11.07.2025 and your subsequent representation dated 14.07.2025 to MNRE regarding clarification on applicability of Domestic Content Requirement (DCR) for SPV cells and modules under the subject project.

MNRE, vide letter dated 11.08.2025, has now categorically clarified that the ALMM orders dated 09.12.2024 and 28.07.2025 in no way relax the explicit requirement of using both domestically manufactured SPV cells and modules, as specified in SECI's tender for the project. Accordingly, the module to be deployed must be fully DCR-compliant, i.e., both the cells and modules must be manufactured in India and the module must be listed in ALMM List-I.

With this, clarity on the matter has now been provided by both MNRE and SECI, vide letter dated 11.07.2025 and emails on many occasions. Finalization of the SPV module make and model has been pending for long and is now on the project's critical path, directly impacting ongoing design approvals, inspections, and site execution activities.

You are therefore requested to finalize and confirm the DCR-compliant module make and model without any further delay so that the project can progress smoothly and avoid any disruption to designs, inspections and on-site works.

We look forward to your immediate confirmation.

Warm regards,

11/08/25
